Course Summary

By utilizing validated mobility outcomes for lower limb prosthetic patients, health care teams can empower patients to understand and participate in their own care leading to higher satisfaction. This introductory level course designed for PT/PTA's, OT/OTAs, Nurses and Case Managers teaches on new methodology on collecting outcomes, utilizing the Prosthetic Limb Users Survey of Mobility (PLUS-M) self-reporting instrument. This course ensures the learner understands patient and output research trends, and more specifically, how health care teams can collaborate with physicians and patients alike to improve patient care. The course includes lecture and sample patient case studies to review best practices as a team, and an example of how a large prosthetic care company is using outcomes in everyday care.

Objectives

Upon completion of this program, the participant will be able to: 1) communicate the benefits of using outcome measures with lower limb prosthetic patients; 2) discuss the Prosthetics Limb Users Survey of Mobility (PLUS-M) assessment, how it was developed, how it is used to assess mobility for patients that use lower limb prosthetics to provide objective outcomes; 3) define correlation with outcomes and standard of care; 4) identify trends in adult limb loss populations; 5) review sample patient case studies and best practice approach to rehabilitation and a successful care plan; and 6) demonstrate the value in a health care team approach to limb loss patient care.

Continuing Education Requirements

In-Person Sessions: All attendees are required to attend the entire session, sign-in at the beginning and at the end of the course. **Webinar Sessions:** All attendees are required to attend the entire session, and complete a credit request form and evaluation following the session. Throughout the presentation learning outcomes will be assessed through instructor interaction and attendee's participation through Q & A.

Detailed Course Outline

Sign In/Log-In

Pre Test (if required)

60 Minutes – Lecture

- A patient's story: empowering through mobility
- Patient population trends in dysvascular and trauma patients
- PLUS-M assessment tool and other assessment instruments
- Sample patient case studies and outcomes
- Questions and Answers

Post Test (if required)

Course Evaluation (Online)/Sign-Out/Log Out

Special Requests

Hanger Clinic strives to make our learning environments fully accessible and want to provide our guests with an opportunity to identify special needs in advance of the course. Please contact your course coordinator.

Note: If course tuition required, see course flyer for policy on fees and cancellation charges. If Hanger cancels for any reason, a full refund of course tuition paid to Hanger will be given.
